Microsoft Studio

Success case 1: Application modernization in a large energy company
Application modernization in a large energy company
We helped our client improve efficiency, reduce maintenance and operation costs, and adopt the latest technologies.

What was the challenge?
The company’s challenge was creating long-term value and staying competitive during the digital revolution. They had an urgent need to improve their customer experiences.

What was the solution?
The client entrusted Globant’s Digital Transformation Program. This involved implementing a central services bus supported by Azure PaaS, Azure DevOps for continuous delivery, and Application Insight as a monitoring tool.

Outcomes
Globant’s program has delivered and continues to create solutions for this client. One such solution is their mobile app which enables customers to make payments at gas stations, while also functioning as a loyalty program. Meanwhile, they have implemented an IoT fuel station platform which improves their vendors’ work as they can access relevant information in real-time for custom sales. This has resulted in improved performance on their key business KPIs.
About Globant

We are a digitally native company that helps organizations reinvent themselves and unleash their potential. We are the place where innovation, design, and engineering meet at scale.

- We have more than 27,000 employees and we are present in 25 countries and 5 continents working for companies like Google, Electronic Arts and Santander, among others.
- We were named a Leader in the IDC MarketScape: Worldwide AI Services 2023 Vendor Assessment (doc #US49647023, May 2023) and Worldwide leader in Customer Experience Improvement Services 2020 Vendor Assessment (doc # US45658220 , September 2020).
- We were also featured as a business case study at Harvard, MIT, and Stanford.
- We are active members of The Green Software Foundation (GSF) and the Cybersecurity Tech Accord.
